Talk to me

The more I know about you & your child, the better I can help you. Because you & your child are my patients, you are very important to me!

Tell me about anything you are thinking about your child – things you are proud of, things you are worried about. Tell me about how your child is getting along in your family & community.

Tell me about your child - things you are proud of & things you are thinking about anything you are thinking you are worried about. Talk to me about anything you are thinking you are worried about.
