

# *Talk to me*

*Because you & your child are my patients,  
you are very important to me!*

*Talk to me about anything you are thinking  
about your child - things you are proud of &  
things you are worried about. Tell me about  
how your child is getting along in your family &  
community.*

*The more I know about you & your child, the  
better I can help you!*
